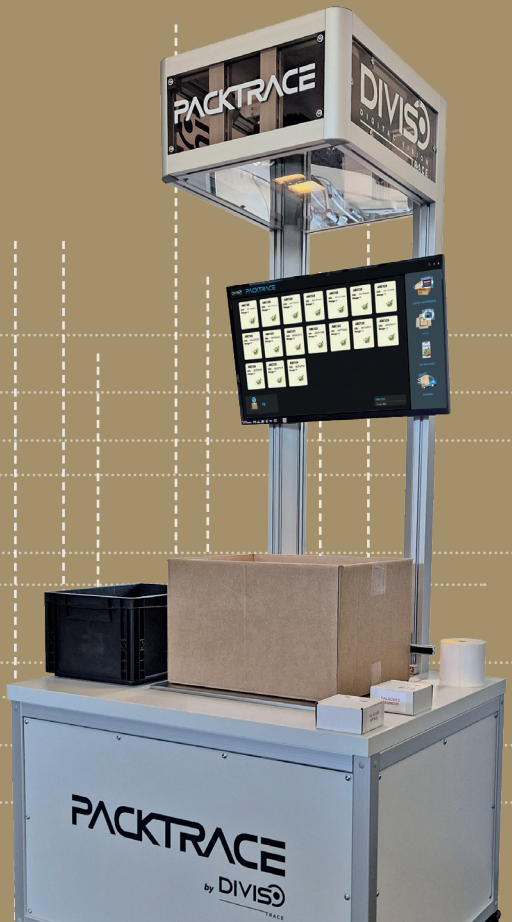
PACKING PROCESSES OPTIMIZED

DIVISO DIGITAL VISION TRACE

PACKTRACE



INNOVATIVE TECHNOLOGY
FOR AN OPTIMIZED SUPPLY CHAIN!

- 100% accuracy in outbound goods
- Seamless integration with ERP and WMS systems
- End-to-end traceability with photo documentation
- Faster processes through real-time scanning
- Process automation & error reduction
- Optimized data foundation for better decision-making
- Optional weight control to ensure that pre-packaged bundles are correct.

PackTrace offers a smart, secure, and efficient solution for manual packing processes:

Maximum security and full transparency in traceability!

- Retrieve the packing list and pack individually.
- Each package is recorded on the fly, significantly accelerating the entire process.
- Shipping registration can be carried out automatically!

INTELLIGENT PROCESS OPTIMIZATION

Also applicable in electronics manufacturing for the dispatch of assembled circuit boards or finished devices.

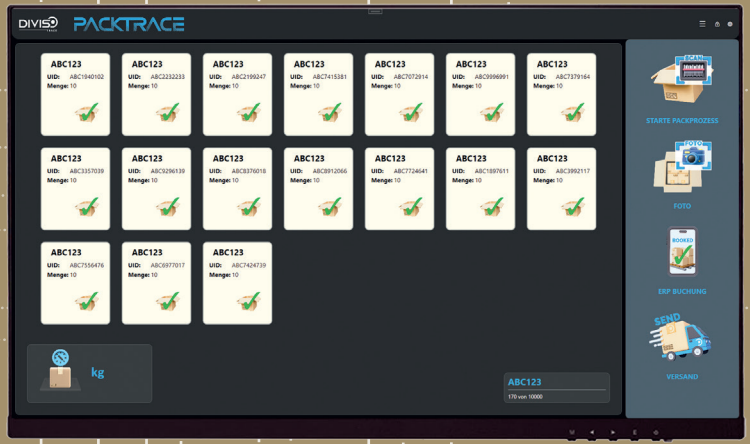
PACKTRACE



HARDWARE & SOFTWARE – Perfectly aligned

State-of-the-art hardware and intuitive software for easy operation, real-time checks, and smart statistical functions to support better negotiations with carriers.

Improvement of manual packing processes through automated photo documentation that captures every packing layer:
100% security and traceability.

2 Products - 1 Team!

- Automatic completeness and quality control
- Faster processes through lightning-fast scanning of all barcodes
- Process automation & error reduction
- End-to-end traceability
- Seamless integration into existing logistics processes and ERP systems (e.g. WMS: warehouse management system)
